2021/10/1~2/15

Hachigoro Toshima Wetland
Originally, one male Oriental White Stork landed in the Toshima Wetland after flying over from China. On August 5 of 2002, he was given the name "Hachigoro."

Hachigoro Toshima Wetland

From Kinosaki Onsen
10min

Genbudo Park

Check out the beautiful stone columns at Genbudo Park!
The columns were formed from the cooling of hot volcanic magma flowing down the mountain tops 1.6 million years ago. Once the magma hardened, beautiful "columnar joints" formed and can now be seen at the Genbudo Caves.
*Due to construction, some areas may not be accessible to the public.
